DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 12/6/2000 has been considered by the examiner. Prior art mentioned in the specification, but not in the IDS has not been considered.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 1 recites the limitation "such THV" in line 6. It is unclear whether this is referring to the previous THV or a new one. The phrase is being read "said THV" in this office action.

6. The use of several abbreviations makes claim 1 difficult to understand. Other than CA, which is well known in the art, the other abbreviations should be spelled out upon their first use.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Aiello et al., US Patent number 6,397,329.

With regard to claim 1, as best understood, Aiello discloses a method for revoking a public key certificate (column 5 line 62-column 6 line 9) including, hashing a random number under the control of a revocation service (column 4 lines 40-45, column 9 lines 7-33), sign the hashed number to the public key with a private key (column 1 lines 48-55), and ceasing to update the certificate upon request (column 9 line 52-column 10 line 18).
